***Drawings***

1. Figures 1, and 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Figs. 1 and 4 should be labeled as prior art since the figures are identical to what is being disclosed in U.S. patent 4,792,363. The examiner carefully reviewed both Figures and the reference numbers in each of these Figures are IDENTICAL to that of the prior art. The burden is shifted on applicant to specifically point to the reference numbers of each Figure in order to differentiate the differences between the prior art and the instant application.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Franklin Jr. (4792363) and further in view of Berfield (6478342).

Art Unit: 1746

In reference to claims 10-12, refer claims 10-12 of Franklin Jr. et al. Franklin Jr. teaches the invention substantially as claimed with the exception of a swivel cuff between the vacuum source and the vacuum conduit. Berfield teaches a swivel coupling for a hose. Fig. 1 shows a swivel cuff 14 positioned between a vacuum source 16 and a hose 20. The swivel cuff allows the hose to swivel, so the vacuum attachment may be positioned as needed and the hose does not kink during use. In reference to minimizing torque, Berfield teaches the swivel coupling which allows the hose to swivel or rotate during use, thereby minimizing twisting forces and kinks in the hose.

It would have been obvious to a person of ordinary skill in the art to have modified the method of Franklin Jr. to include the swivel coupling of Berfield, for purposes of allowing the hose to swivel or rotate during use, thereby minimizing twisting forces and kinks in the hose during use.

5. Applicant argues that Franklin Jr. fails to teach a swivel cuff. Applicant's arguments are unpersuasive in view of the new grounds of rejection and the teachings of Berfield.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Contant et al., Jacobus, Gans, Passien, and Smith Jr. et al. teach swivel cuff for easy rotations of a vacuum hose.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
